

NETWORK TECHNOLOGIES OF METASWITCH

METASWITCH'S NETWORK TECHNOLOGIES ARE THE WORLD LEADER IN NETWORK TECHNOLOGIES FOR SYSTEM VENDORS. FOR OVER 25 YEARS WE HAVE PROVIDED NETWORK SOFTWARE PROTOCOLS AND PRODUCTS, DEVELOPER TOOLKITS, AND ENGINEERING SUPPORT TO COMMUNICATION EQUIPMENT MANUFACTURERS, WHO IN TURN HAVE SIGNIFICANTLY REDUCED THEIR DEVELOPMENT COST, RISK, AND TIME TO MARKET.

THE METASWITCH DIFFERENCE

Over 25 years of revenue and customer base growth is not by chance. Metaswitch utilizes a unique business model to ensure that our products and support are vastly superior when compared to alternatives in the industry, and provide carrier-class levels of reliability, scalability and availability. Our corporate structure, technology and product support, the "Metaswitch Difference", drives our perpetual success in the world of communications.

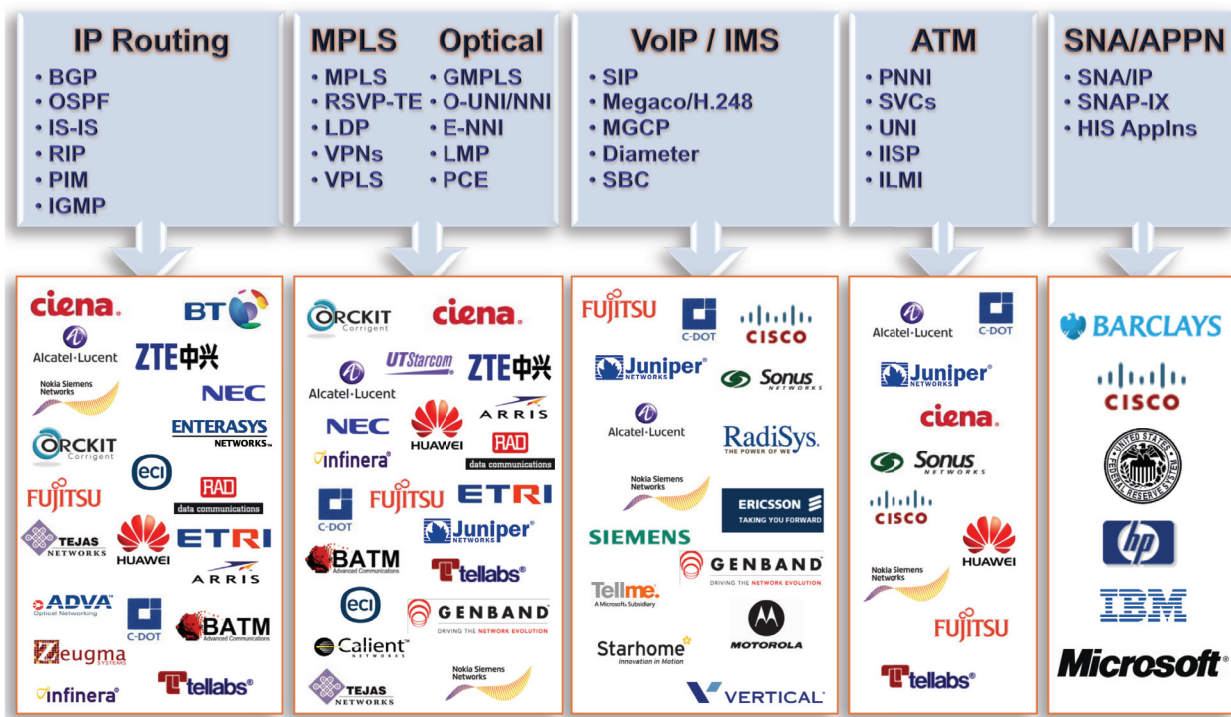

PRODUCT PORTFOLIO

Metaswitch's Network Technologies offers a wide range of network software protocols and products including Unicast and Multicast IP Routing, MPLS, OTN, PCE, VPNs, VoIP, Session Border Control, Diameter, IMS, and ATM.

INDUSTRY LEADER IN NETWORKING SOFTWARE

Our unique ability to retain long term customer partnerships comes from

- the breadth and quality of our product portfolio
- our focus on meeting the complex needs of our customers
- above all, our unique corporate structure that enables us to recruit, develop and retain exceptional engineering talent.

CUSTOMER BENEFITS

SUPPLIER STABILITY

Our financial independence and employee retention allow us to provide our customers with a strategic, mutually beneficial, long-term technology partnership

SUPERIOR QUALITY

- Strict design and coding standards based on Quality Management System
- Small, stable and responsive teams with exceptional track record for on time, high quality delivery
- Nightly unit, functional, and system tests
- 60% of code is written for testing
- Active participation in industry test events

SCALE AND PERFORMANCE

- Metaswitch products contain no hard coded limits: Only constraints are memory and processing power
- Metaswitch products behave gracefully under resource shortage
- Metaswitch products may be distributed across multiple linecards, multiple processors or multiple cores
- Metaswitch products scale: DC-SIP achieves over 1 billion calls per year at Tellme Networks

WORLD CLASS SUPPORT

- Support teams are staffed with senior engineers from the development teams
- Unlimited support with firm contractual response and resolution times
- All levels of code supported; fixes back applied to customer code level
- Education courses available at customer site

TOP ENGINEERING TALENT

- Annual turnover rate in engineering is <3%
- Consistently high ranking in annual employee survey company awards

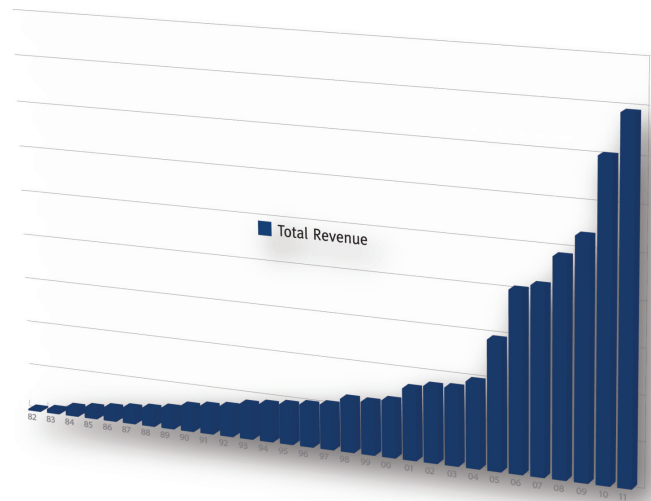

ABOUT US

NETWORK TECHNOLOGIES OF METASWITCH

Metaswitch Network Technologies provides networking software stacks and solutions to OEMs and system vendors worldwide. Formerly known as Data Connection, Network Technologies is the genesis of Metaswitch Networks from which our core values of reliability, quality, exceptional support and innovation were born.

We take a long-term approach at Network Technologies which is exemplified by our 25-plus years of service to the industry. Network Technologies builds strategic, lasting customer relationships, designs future-proof product architectures, and believes that a sustainable, successful business is in the best interests of our people and our customers.

REVENUE 1982-2011
